

## **Wake Up the Earth *REVISED* Food Vendor Guidelines:**

WUTE requires that the food vendors use minimal packaging (no plastic wrapped spoons and forks, for example) and that all utensils, plates, etc are “environmentally responsible” and Please no Styrofoam.

WUTE recommends Eco-Products, Inc (<http://www.ecoproducts.com/>). Eco-Products offers a wide range of products, including utensils, made from sugarcane. They also offer products that can handle foods exceeding 130F. These products can be ordered directly off of Eco-Product's website.

SHOULD a company prefer to order green-friendly foodservice products from Perkins1.com, WUTE would recommend that they choose GenPak's "Harvest Collection" as these products meet stringent, scientifically based specifications ASTM D6400 or ASTM D6868, as specified by BPIWorld.org (The Biodegradable Products Institute). GenPak's "Harvest Collection" offers cups, plates, bowls and hinged containers derived from corn. These products can be used on foods up to 130F, but cannot be used with microwaves or foods that will exceed 130F.
